EDUCATIONAL TRIP TO HARBIR NURSEY FARM (SHAHABAD)
(March 28, 2022)

An educational trip to Harbir Nursery Farm, Shahabad was organized for B.Sc. IIIrd (Medical) students on March 28, 2022. Twenty students visited the farm. Students were welcomed by Mr. Harbir Singh (Owner).

The aim of the visit was to see Innovations in Crop Production Practices. Varieties of vegetable crops are grown in the Harbir Nursery Farm, which are then sold to the farmers. Organic farming is adopted to make the germination medium and rearing medium. They are constantly working hard to build a healthy soil rich in organic matter with all the nutrients that the plants need. They also make compost from animal manures. Soil with high organic matter resists soil erosion, holds water better and thus requires less irrigation. Soil amendments like rice husk ash, cow dung, poultry waste and cocoa peat are added to adjust the moisture and nutrient balance.

Students saw seed germination chamber where seeds with hard seed coat are germinated by high temperature. Likewise other summer crop seeds which need appropriate temperature are germinated early in the season by providing solar heat. This germination chamber was made with low input cost without compromising the output.

Afterwards newly sprouted plants are cared in the vegetable nursery during the early stage of growth, providing optimum conditions for germination and subsequent growth until they are strong to be transplanted out in their permanent place or field Mr Harbir has devised his own locally indigenous techniques/practices to reduce the cost of pesticides, fertilizers by efficient and effective use of inputs, resources, water, land etc. A nursery can be as simple as a raised bed in an open field or a sophisticated green house with micro sprinklers and controlled atmospheric systems. The center theme of Harbir Nursery Farm management is a trade atmospheric systems. The center theme of Harbir Nursery Farm management is a trade atmospheric systems, which focus on efficient utilization of resources for economic returns.

EDUCATIONAL TRIP TO SHAHABAD SUGAR MILL, SHAHABAD MARKANDA (March 28, 2022)

An educational trip to Shahabad Sugar Mill, Shahabad was organized for B.Sc. IIIrd (Medical) students on March 28, 2022. Twenty students visited the Mill. Students were welcomed by Mr. Manish Aggarwal (Chief Engineer cum factory Manager), who deputed Mr. Sounak Ghosh (Instrument Engineer) as demonstrator.

The aim of the visit was to see the processing of raw sugarcane. The processing of sugarcane into cane sugar (sucrose) consists of the following steps: crushing of sugar cane, heating of cane juice and filtration, then series of crystallization steps to create crystals of raw sugar, followed by centrifugation to remove any remaining juice or syrup. Several pollutants are also emitted during different stages of this process. Students also learned about the control measures adopted by the Mill. Mr. Sounak Ghosh (Instrument Engineer) showed various equipments and machines involved during the processing. Students also interacted with the skilled mechanics at various places.

Students also saw the other products of the processing i.e., bagasse, molasses, and filtercake. They learned that bagasse, the residual woody fiber of the cane, is used as a renewable resource, for several purposes: fuel for the boilers and lime kilns, agricultural mulch, and as a raw material for production of chemicals. In this Mill, Bagasse and bagasse residue are primarily used as a fuel source for the boilers in the generation of process steam. Dried filtercake is used as an animal feed supplement, fertilizer, and source of sugarcane wax. Molasses is used to produce ethanol, compressed yeast, citric acid, and rum. In a nut shell, this visit was a knowledgeable visit.
