Suggestions by the Teachers

5 responses

Some advance topics related to transaction management should also be included in this course. As databases management system subject has high weightage in competitive exams and this topic really help the students to clear these exams.

Requirement of space for art gallery, more smart class rooms, reading rooms, project based learning at undergraduate level, more computers for remote sensing and air-conditioned labs for GIS, more job oriented programs and courses, compulsory computer awareness for all, database management system, latest technology and techniques for students.

More practical approach is needed in the syllabus provided by the university and field project, internship is much needed in the designing and implementation of the curriculum

Job oriented paper : students learn very much from this

one industry, business and profession designed practical syllabus should be conducted so that project and viva voce can be conducted.
