

## **ACTION TAKEN REPORT ON STUDENTS' FEEDBACK**

Student feedback is a critical component of the educational process, providing valuable insights into the effectiveness of teaching methods, curriculum design, and overall learning experiences. It serves as a mirror reflecting the strengths and weaknesses of teaching methods employed by educators. By understanding what resonates with students and what doesn't, teachers can adapt their approaches to better meet the needs of their students.

Feedback from students provides valuable insights into the relevance and effectiveness of the curriculum. It helps educators understand which topics are engaging and which may require further explanation or revision. Aggregate student feedback provides valuable data for assessing the overall effectiveness of educational programs and institutional policies.

In pursuit of continuous improvement and ensuring quality education, the Internal Quality Assurance Cell (IQAC) of the college conducted an online feedback survey to gather insights from students regarding various aspects of their learning experience.

The survey was conducted using a Google Form questionnaire, designed to comprehensively cover different dimensions of the learning experience. The questionnaire included sections focusing on course content, teaching methods, assessment procedures, and overall satisfaction. The link to the Google Form was disseminated to all students, enabling them to provide feedback conveniently through an online platform.

The analysis of the survey indicated that Majority of the students expressed satisfaction with the relevance and comprehensiveness of the course content. Some students suggested the inclusion of more practical applications and real-world examples to enhance understanding.

The feedback indicated a diverse range of teaching methods employed by faculty, with lectures, discussions, and multimedia presentations being the most common. While many students appreciated the interactive nature of classes, some suggested incorporating more interactive and participatory activities to promote active learning. A significant proportion of students expressed overall satisfaction with their learning experience at the college. However, some students highlighted areas for improvement, such as better communication of course expectations and clearer feedback on assignments and assessments.

In response to the invaluable feedback provided by students through our recent survey, this report outlines the key suggestions and recommendations put forth by the students. These suggestions aim to enhance various aspects of the educational environment, fostering a more conducive and enriching learning experience.

### **Updated High-Processor Computers:**

Students have highlighted the need for upgrading computer facilities to include high-processor computers.

### **Better SMART Classrooms**

Improving SMART classrooms with state-of-the-art technology and interactive learning tools can revolutionize the teaching-learning process. Enhanced SMART classrooms will enable dynamic and engaging instructional delivery, catering to diverse learning styles and promoting active participation among students.

### **Relevance of Syllabus to Industry and Job Market Needs**

Students emphasize the importance of aligning the syllabus with industry trends and job market demands. Regular review and updating of the curriculum to incorporate industry-relevant topics, emerging technologies, and practical applications will better prepare students for their future careers.

### **Expansion of Master's Level Courses**

Expanding the range of master's level courses will provide students with more specialized and advanced learning opportunities. Diversifying the postgraduate curriculum to include niche areas of study will cater to the diverse academic interests and career aspirations of students.

### **Implementation of Digital Classrooms**

The integration of digital classrooms equipped with audio-visual aids, e-books, and online resources can enhance the effectiveness of teaching and learning. Digital classrooms offer flexibility, accessibility, and interactivity, enriching the educational experience and promoting self-directed learning.

### **Increase in Seminars and Workshops**

Organizing more seminars and workshops on relevant topics will expose students to contemporary issues, industry insights, and professional development opportunities. These platforms facilitate knowledge exchange, networking, and skill enhancement, augmenting the overall learning experience.

### **Introduction of Skill Development Courses**

Incorporating skill development courses alongside academic programs will equip students with practical skills and competencies essential for success in the workforce. Offering courses on communication skills, leadership, entrepreneurship, and digital literacy will complement academic learning and enhance employability.

### **Provision of Adequate Drinking Water Facilities**

Ensuring the availability of clean and safe drinking water facilities across campus is essential for promoting student health and well-being. Accessible water dispensers or hydration stations will cater to the hydration needs of students, supporting their overall comfort and productivity.

The Chair, the College Council review and discuss the suggestions put forth by students regarding the improvement of various aspects of the educational and IQAC comprising representatives from faculty, administration, and student body. After careful consideration, the following recommendations have been formulated to address the concerns raised and to foster a more conducive learning environment.

### **Updated High-Processor Computers**

- Recommendation: Demand for the procurement of high-processor computers to be installed in designated computer labs and learning centers across campus.

- Action Plan: Collaborate with the IT department to conduct a needs assessment and initiate the purchasing process for high-performance computing equipment.

### **Better SMART Classrooms**

- Recommendation: Invest in the upgrade and expansion of SMART classrooms with interactive whiteboards, multimedia projectors, and audio systems.

- Action Plan: Form a task force comprising faculty and technology experts to assess current SMART classroom infrastructure and develop a comprehensive plan for enhancement.

### **Expansion of Master's Level Courses**

- Recommendation: Conduct a feasibility study to assess the demand for and viability of expanding master's level course offerings in niche areas of study.

- Action Plan: Formulate a proposal outlining potential master's programs, target student demographics, and resource requirements for consideration by the academic board.

### **Increase in Seminars and Workshops**

- Recommendation: Allocate additional funding for organizing seminars, workshops, and guest lectures on relevant topics aligned with student interests and academic disciplines.

- Action Plan: Establish a seminar coordination committee to solicit proposals, organize logistics, and promote student participation in upcoming events.

### **Introduction of Skill Development Courses**

- Recommendation: Introduce a series of skill development courses and certificate programs designed to enhance students' employability and career readiness.

- Action Plan: Collaborate with industry partners and career services to identify skill gaps and develop course modules addressing communication, leadership, digital literacy, and other essential skills.

### **Expansion of Laboratory Facilities**

- Recommendation: Prioritize capital investments for the expansion and modernization of laboratory facilities, focusing on disciplines with high demand for hands-on experimentation and research.

- Action Plan: Form a laboratory renovation task force to assess current facilities, solicit input from faculty, and develop a phased renovation plan aligned with budgetary constraints.

### **Provision of Adequate Drinking Water Facilities**

- Recommendation: Install additional drinking water dispensers or hydration stations at strategic locations across campus to ensure convenient access for students and staff.

- Action Plan: Collaborate with campus facilities management to identify suitable locations, procure necessary equipment, and implement installation procedures in a timely manner.

The College Council acknowledges the valuable feedback provided by students and is committed to implementing the above recommendations to enhance the educational environment and support the holistic development of our student community. By working collaboratively with stakeholders and allocating resources effectively, we aim to create a learning environment that fosters excellence, innovation, and student success.
